Mr. Hardee:

A program commitment at a local nursing home will prevent my attending the hearing at Alamance Community College tomorrow evening.

I urge the Division of Water Quality to take action to require the City of Burlington to

- Notify the public when sewage sludge is being spread.
- Minimize potential exposures to pollutants.
- Increase the distances from sludge spreading to private wells, surface waters, adjoining properties, and public spaces.
- Test the sludge for more toxic substances.

Carole W. Troxler
